DETAILED ACTION

Response to Amendment - Election/Restriction

1. This action is in response to the "Response to Restriction Requirement" filed December 13, 2005. Applicant's election of the invention of **Group 1**, claims 1-19, per the Restriction Requirement mailed October 13, 2005 (hereinafter "the 10/4/05 requirement") **with** traverse in said response is acknowledged. However, because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election **without** traverse (see MPEP § 818.03(a)). **Furthermore**, applicant has cancelled original claims 20-49, corresponding to **Groups 2-4** in the 10/4/05 requirement, and presented new claims 50-76, asserting that all pending claims fall within **Group 1**. Applicant's remarks have been carefully considered, but it is respectfully disagreed that each of the new claims falls within **Group 1** of the 10/4/05 requirement. **Moreover**, given the amendment to the claims, the 10/4/05 requirement is no longer considered applicable. **Thus**, the 10/4/05 requirement has been **withdrawn**, and, in accordance with MPEP §§ 811-811.02, a **new** restriction requirement is hereby made; please note that applicant is free to elect **either one** of the following groups for prosecution on the merits, with the election of prior **Group 1** now considered **moot**.

2. Restriction to one of the following inventions is required under 35 U.S.C. § 121:

Group 1. Claims 1-19 and 59-76, drawn to methods of capturing gas phase pollutants in a combustion system (having an air preheater)

comprising, at the least, creating a model of the combustion system, classified in class 423, subclass 210+.

Group 2. Claims 50-58, drawn to a combustion system, classified in class 431, subclass 18+.

3. The inventions are distinct, each from the other, because of the following reasons:

4. The inventions of **Group 1** and **Group 2** are related as process and apparatus (system) for its practice. The inventions are distinct if it can be shown that **either**: (1) the process as claimed can be practiced by another materially different apparatus or by hand, **or** (2) the apparatus as claimed can be used to practice another and materially different process (see MPEP § 806.05(e)). In this case, the process as claimed can be practiced by another materially different apparatus, as evinced by the **Group 1** claims, wherein the **specific** apparatus of **Group 2** is not required.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, **and** because the search required for **Group 1** is not required for **Group 2**, restriction for examination purposes as indicated is proper.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed, per 37 CFR § 1.143.

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR § 1.48(b) if

Art Unit: 1754

one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR § 1.48(b) and by the fee required under 37 CFR § 1.17(i).
